

SKIN SCRUBBER

P302VIS003

The ultrasonic vibration technology gently exfoliates the skin to remove fat, blackheads and other impurities from the skin, while helping to unclog pores.

This device promotes nutritional absorption, accelerates the skin's metabolism and, thanks to ultrasound stimulation, helps to tone the skin, making it more elastic. The ionic function promotes the absorption of creams and serums by the skin, allowing it to nourish itself properly and accelerating the regeneration of skin cells for smoother, firmer skin.
