

RECHARGEABLE PERCUSSION MASSAGER

P302MAS002

Rechargeable percussion massager ideal for relaxing muscle tension and treating sore or stiff areas.

The rapid and constant pressure pulses at a maximum of 3700 rpm stimulate the blood circulation, making the massage more effective and targeted to the affected area.

The advantage of percussion therapy is that it works deeper into the muscle tissue, making faster and more efficient recovery possible.

Equipped with 6 selectable intensity levels and 4 interchangeable heads adapted to the different areas to be treated.

The long-lasting lithium battery enables cordless use for maximum comfort and an autonomy at maximum charge of more than 20 cycles of 15 minutes each. Ultra-quiet operation and lightweight, compact design for easy use.
