

ELECTRIC ICE SCRAPER

P201UTP002

Here is the evolution of the good old ice scraper!

By heating up, the electrical resistance helps to melt the layer of ice that forms on the windshield and windows when the car is parked outside.

The extendable handle and 4.5 meter cable are perfect for reaching any point on the windshield, effortlessly.

The integrated LED light allows you to use the scraper even in low light. With 12 V socket, ideal to keep in any vehicle just in case!
